

The Step-by-Step Solution for Setting Up Wireless Access!

Short Description

iCafeWiFi is a complete secure wireless access system that allows you to turn your internet access into profits. With little technical knowledge required, iCafeWiFi, lets you offer fee-based or free wireless access by the hour, day, week or even month. This means anyone using a laptop with a WiFi access card, can walk into your store, buy access time, and log onto the internet from the convenience of your store!

Features and Benefits...

Complete System

iCafeWiFi comes with everything you need to provide wireless access to your customers.

Easy Installation

iCafeWiFi comes with step-by-step instructions that show you how to set up and configure your wireless network.

Attract New Customers

With iCafeWiFi, you can attract laptop users to come to your store for studying, e-mailing, working, gaming or surfing the web.

Increase Revenue

iCafeWiFi is an easy way to increase revenues by selling internet access to laptop users.

Convenience for the merchant

iCafeWiFi transactions process in seconds allowing for speedy service with no administration requirements for your employees. There are no monthly management fees, transaction fees or set-up fees required.

Convenience for the customer

In addition to speedy service, customers can purchase wireless access time by the hour, day, week or even month.

Product Information:

The iCafeWiFi system has three main components:

- (1) **Wireless Access Point (DWL-G700AP):** Provides the actual wireless Internet connection, when hooked up to your Internet.
- (2) **Hotspot Gateway (DSA-3100):** Secures your wireless Internet access and manages user timing and payment.
- (3) **AirSpot Ticket Printer (DSA-3100P):** Prints receipts with usernames and passwords for Internet access.

Components:

■ iCafe WiFi Includes:

- DWL-G700 AP 2.4 GHz Wireless Access Point
- DSA-3100 Public/Private Hot Spot Gateway
- QuickStart Installatin Guide
- DSA-3100P Ticket Printer

■ Store Requirements:

You must already have an internet service provider supplying internet access to your store.

■ System Requirements:

Microsoft Windows 2000, XP
CD-ROM Drive
At least 5MB of hard disk space available
Available Ethernet port

How It Works:

1. Connect the Hotspot Gateway to your Cable/DSL modem.
2. Connect the Wireless Access Point to the Hotspot Gateway.
3. Configure Hotspot Gateway and Wireless Access Point via simple web-based configuration tools using your PC.
4. Connect Ticket Printer to the Hotspot Gateway and configure ticket printing options using your PC.
5. Accept payment for internet access using your cash register.
6. Press the print button to print a ticket with a username and password valid for internet access for the set amount of time.
7. Customers log on using the provided access codes for the specified time period.
